UPNG

students' competencies, practices and attitudes to Technology Enabled Learning (TEL)

This survey is conducted by the Linguistics Department SHSS with the AIM to explore current UPNG students' competencies,
practices and attitudes to Technology Enabled Learning (TEL) curriculum at UPNG. By identifying the areas of progress (as well as challenges) in this area, this study will help UPNG create a better learning environment for our students. The data collected may also be useful in determining what digital tools the "average" student owns and what IT services the Waigani campus should provide.

All undergraduate students, currently registered in the 4 UPNG Schools in Waigani Campus, are eligible to participate in this study. The information you share will remain confidential and will be used strictly for research purposes. Your participation, though highly solicited, is voluntary.
